8 Fool-Proof Rail Crossings, Sm. Marks Stock Bought in Europe

Jerusalem Post Bureau

HAIFA Wednesday. — Eight fully automatic fool-proof railway level-crossing gates costing \$3,500 each were ordered in France by Mr. M. Seidler, the railway General Manager who has just returned from a purchase trip to Europe. He also ordered nearly five million marks worth of equipment, rolling funds from reparations payments in Germany.

Mr. Seidler told the press here today that he had ordered an automatic signalling system for the Haifa-Tel Aviv line. This was to be supplied within nine months. The installation will be supervised by French experts and will take about six months. The system will assure greater safety and enable 15 to 18 trains to travel in each direction on the single track line daily. The manual block system will also make for greater speed and safety. He also ordered a modern telephone system including teleprinters for international communication.

An order of 50 closed freight cars for transport of goods to arrive by November in time for the citrus season which is expected to yield two and a half million boxes for export, more than last year. He also ordered parts and materials for the construction here of another 100 to 125 freight cars. It is hoped that 50 of them will be ready by November. The wagons will be constructed by a partnership of the German companies and Magen Chabod.

8 Coaches Due
Before the High Holidays four of eight passenger carriages on order are due here, while the rest should arrive by the end of September. Ten sets of self-propelled rail cars are also ordered and the first are due by October. They consist of three cars each seating 200 passengers. First freight wagons on order are due here, while the rest should arrive by December, but the delivery date of the remaining cars has not yet been fixed.

Mr. Seidler said that with the arrival of the equipment, railway development would get the green light. The line to Beer Sheva will be completed by the end of the year, followed by the line from Haifa through Tel Aviv directly to Jerusalem, the building of the line from Beer Sheva to Jerusalem and the extension to standard gauge and operation of the new line narrow gauge Haifa-Jerusalem line in the near future.

Mr. Seidler said that with the arrival of the equipment, railway development would get the green light. Histadrut Industry Plans Big Expansion

Jerusalem Post Bureau

TEL AVIV Wednesday. — A five-year plan for setting up a large-scale network of factories was set on foot today by a meeting in principle taken at a meeting here of Histadrut industry.

Among the projects envisaged are an integrated "from raw material to product" industry for steel and other metals and plants for agricultural machinery, food processing, chemicals and electrical equipment. Another project being considered is a factory for the production of diesel tractors.

The scheme also envisages the construction of existing enterprises. The programme is to be developed in the Government's general development plan. It was said that the Government's strengthening of the country's economy by stabilizing its foreign trade balance and at the same time increasing productive employment.

From 18,000 hands
It is estimated that 10,000 to 15,000 workers will be employed in the enterprises. Financial backing is to come from various sources.

Historically, it was said, will employ all channels to assist the necessary capital, including the accumulated capital of Histadrut enterprises. The Government Development Budget, and by utilizing private capital here and abroad.

The proposed plans are to be spread over the country, in accordance with the Government's policy of dispersing the population. It was stated, and settlements and co-operatives are to be included in the scheme.

The completed proposals are to be brought before the special conference of 500 leaders of Histadrut industry called for later in the month.

Nahal Revives Ancient Lachish

Jerusalem Post Bureau

LACHISH, Wednesday. — This historic site was put back on the map today as a five-plan, Nahal established a settlement beside the ruins of the ancient fortress. Another Nahal settlement was set up today at Uvda near the abandoned village of Duvvina, some two-and-a-half kilometers west of the foot of Mt. Sion.

Short convoys marked the occasion at both places. The settlers, all men and women of the Nahal movement, were accompanied by the Nahal staff and the Nahal staff. The Nahal staff and the Nahal staff.
